

Anti-blocking Agent

Anti-blocking agents act to reduce the CoF between film layers and are therefore essential additives in the production of plastic LDPE and other films. They can be broadly separated into organic and inorganic additives, and they are often used synergistically.

Item name	Type	Average particle size D50/um	Equivalent to
BX silicone K45	Silicon	4.0-4.5	Sylobloc 45, SPHERILEX 30
BX silicone K70	Silicon	6.5 ~ 7.5	SPHERILEX 60
